

# AP HUMAN GEOGRAPHY TEST CORRECTIONS

If you earn less than an **85%** on a test, test corrections **MUST** be done and anyone else can do them as well. Believe me, this will help you to understand what you have missed and why and will also help your grade. Full credit of points missed can be earned back for every correction done according to the directions.

## **AP Human Geography Test Corrections due a week from the test being returned:**

You have to do the correction part at home.

Carefully follow the guidelines below when doing test corrections.

- Do not write on your original written test or the scantron form. Do all corrections on a separate sheet of paper.
- You must turn in your original test, the short answer and scantron (only parts that you corrected) with your corrections.
- You may correct as many or as few points as you like on either the scantron written or both.
- Corrections that do not follow the correct format will not receive credit.

## **Directions for correcting the scantron portion of the test.**

1. You must neatly write the number of the missed questions and the basic topic of the question.
2. Beneath this write out the letter for each of the listed answers choices (a,b,c and d).
3. Place a star next to the actual correct answer.
4. Next to each letter you must state why the answer is correct or incorrect. Your answer must be based on your knowledge and must add a new piece of information. Please see the model below:

## **Sample original question:**

1. An example of a perforated state is
  - A) South Africa.
  - B) Chile.
  - C) Slovenia.
  - D) Borneo.

## **Sample Correction-**

1. An example of a perforated state is

*a. South Africa	South Africa is a perforated state that is completely surrounding Lesotho.
b. Chile	Chile is an elongated state, which stretches north-south 2,500 miles.
c. Slovenia	Slovenia is a compact state where the distance from the center to any boundary does not vary significantly.
d. Borneo	Borneo is a fragmented state. The island has part of 3 countries located on it, Malaysia, Indonesia, and Brunei.
